REPORT OF THE U. S. DEPARTMENT OF AGRICULTURE GRADUATE SCHOOL 1959-60

This past year has been marked by:

- 1. A large enrollment in after-hours courses and correspondence work.
- 2. Two challenging lecture series: "The International Age in Agriculture" and "The Influence of Social, Scientific, and Economic Trends on Administration (another in the Jump-McKillop Memorial Lecture Series on Public Administration.)
- 3. The publishing of the "International Age in Agriculture" lecture series.
- 4. A vigorous effort through a faculty workshop, our newsletter, monthly luncheons, and annual faculty dinner to evaluate and improve our teaching efforts.
- 5. Significant additions to our program designed to meet the changing educational needs of individual students and government agencies under the New Federal Training Act.

One of the most rewarding aspects of the past year has been the good will, advice and assistance which we have received from the administration board, committee chairmen, members of the faculty, and friends of the School. The success of the Graduate School depends largely on the volunteer efforts and support of the many persons associated with its operation. For their help we are grateful, for without this cooperation our program could not progress. The student body also deserves our thanks for supporting the administration of the program by demonstrating enthusiasm for their courses and confidence in their instructors. A special vote of thanks goes to the many employee development officers and administrative officers who have referred their employees to our program.

ORGANIZATION AND STAFF CHANGES

There has been no change in the membership on the General Administration Board. The Graduate School Council has been changed with the appointment of Mr. Henry G. Herrell as head of the new Department of Special Programs.

THE REGULAR EVENING PROGRAM

The regular program of evening courses has been the backbone of our educational work since the origin of the School in 1921. It continued strong during the 1959-60 academic year, attracting more than 7,200 course registrations, representing about 5,500 individual students in the fall and spring semesters and the summer session. Registration in the fall and spring semesters was about 200 course registrations less than in the previous year, but the summer session saw an increase. There were 3,873 course registrations in the fall semester, 2,712 in the spring semester, and 662 in the summer session.

During the year, our students were registered in 395 different resident evening courses. They covered an extraordinarily wide variety of subjects, ranging all the way from space science and nuclear reactors to shorthand and office techniques. These courses were planned to provide the deepest and broadest possible service for our students.

THE SPECIAL PROGRAM

The Graduate School has just completed its first year of assisting federal agencies through special daytime courses, workshops, institutes and related offerings. Over seven hundred were enrolled in eighteen courses. Most of these were federal executives from sixty-two different bureaus and agencies. Two Management Development Programs for Federal Executives; two seminars in Automatic Data Processing for Federal Executives; one Contract Negotiation Institute for Washington and field contracting officers; and a course in Technical Writing were completed

Our Reading Improvement Program has had a full year. Seventy courses were offered in our reading center. For the first time, reading training was conducted outside of our center; two courses were conducted at Beltsville, and a reading course was started at Small Business Administration. Our daytime reading courses were also opened to employees from other federal agencies. Agencies sending representatives included Federal Bureau of Investigation, Labor, Office of Education, Public Health, Food and Drug, Interstate Commerce Commission, and Small Business Administration.

Response to our special programs has been so gratifying that we plan to double our activities in the coming year. To accomplish this the Board approved the addition of three new staff members.

THE CORRESPONDENCE PROGRAM

The correspondence program of the Graduate School was not only widely accepted in the United States, but aroused considerable interest in many other parts of the world. Students from as far as Laos and Cambodia on one side of the globe, and Argentina and Brazil on the other, sought education in the 20 courses provided in our correspondence program. It should be noted that the 1,500 students registered

in our correspondence courses were in the main United States Federal Government employees, whether at home or abroad.

This year, three new courses were added: Federal Personnel Procedure, Plain Letter Writing, and Directed Change in Contemporary Cultures.

The course in contemporary cultures was tailored to the special needs of foreign service employees of the International Cooperation Administration. A reassuring reaction from this course was the enthusiasm and dedication it yielded from new personnel working in the developing countries. This course also attracted an unusually high quality of student.

Concentrated attention was devoted to disseminating information about the program to all Federal departments and agencies with field employees. In fact, the reactions provided a number of suggestions from outside that should prove fruitful and lead to the development of additional correspondence courses.

Finally, the whole program was reviewed and in part revised to streamline and modernize the older courses. There was clarification of material that experience had indicated needed modification.

PUBLIC LECTURE SERIES

During the year, two series of lectures were conducted by the Graduate School, (1) The International Age in Agriculture which was chaired by Assistant Secretary Clarence L. Miller and (2) The 1960 Jump-McKillop Lectures in Public Administration, chaired by Ralph S. Roberts, Administrative Assistant Secretary.

The International Age in Agriculture series of lectures included:

October 7	Food for Peace Dr. Donald Paarlberg, Special Assistant to the President
October 15	Technical Assistance Programs in Agriculture - International and Regional Dr. Norman C. Wright, Deputy Director - General, Food and Agriculture Organization
October 21	World Agricultural Market - Opportunities and Limitations Dr. Max Myers, Foreign Agricultural Service
November 4	Agriculture and Assistance Programs of the Sino-Soviet Bloc Countries Mr. Thomas C. Mann, Assistant Secretary, Department of State
November 18	Helping Other Countries Improve Their Agriculture Dr. D. A. FitzGerald, Deputy Director for Operations,

International Cooperation Administration

The Jump-McKillop Memorial Lecture Series included:

March 9	A Philosophy for the American Public Executive Dr. Harlan Cleveland, Dean, Maxwell Graduate School of Citizenship and Public Affairs, Syracuse University
March 16	Influence of Social Trends on Administration The Honorable Byron L. Johnson, Congressman, Colorado
April 6	Influence of Economic Trends on Administration Dr. Karl Brandt, Member of President's Council of Economic Advisers
April 13	Influence of Scientific and Technological Trends on Administration Dr. Charles J. Kidd, Chief, Office of Program Planning, National Institutes of Health
April 19	Promoting Administrative Vitality Dr. Marshall Dimock, Professor of Government, New York University

THE GRADUATE SCHOOL PRESS

The 1959-60 lectures have resulted in two publications. THE INTERNATIONAL AGE IN AGRICULTURE was published in May 1960. Three thousand copies were printed and 1,534 copies had been sold by August 31, 1960. The majority of these were purchased by the Department of Agriculture, Department of State, and International Cooperation Administration.

The 1960 Jump-McKillop Memorial Lectures in Public Administration is at press. Two thousand copies will be printed and because of the caliber of these lectures, this publication is expected to be as popular as the previous ones in this series.

SUPPORTING SERVICES

The Graduate School Bookstore:

The Bookstore continues to operate as a service to the students, the faculty, and the committee members. The increase in enrollment and programs has increased the demands for this service. To better serve the students registered for courses and the National Institutes of Health and Beltsville, we have initiated a mail order service. This has proved to be a most satisfactory arrangement to the student and to the Graduate School.

The Graduate School Library:

An inventory was taken this summer to remove from the Graduate School Library Collection all books no longer used as references. This will result in the disposal of approximately 500 volumes, and will provide space for the new books added to the Collection.

INSTRUCTION IMPROVEMENT ACTIVITIES

Faculty Luncheons were conducted during the year with discussions covering a wide range of topics designed to broaden the interests and knowledge of faculty and committee members and to improve instruction and promote fellowship and personal identity with the Graduate School.

In January, a Faculty Workshop on "How We Learn" was conducted at the National 4-H Center. All who attended and participated were very enthusiastic as to its benefits. The proceedings were mimeographed and distributed to those faculty members unable to attend and to others interested in the Graduate School.

Monthly Newsletters continued to be published to keep the faculty and others appraised of the activities of the school. A few pictures were added for variation and emphasis.

An annual dinner meeting for faculty and committee members was given at the Press Club to launch the new school year. Nearly 300 attended as guests of the General Administration Board. Dr. Chauncey D. Leake, Assistant Dean and Professor of Pharmacology in the School of Medicine, Ohio State University, was the guest speaker. Twenty-year Length of Service Awards were given to faculty members and certificates of accomplishment were given to deserving students. The faculty members receiving the twenty-year awards were Dr. Bushrod Allin, Dr. F. V. Waugh, Dr. Wylie Goodsell, and Mr. Morris Hansen.

FINANCIAL STATEMENT

Two years ago, in the 1957-58 Annual Report, an increase in faculty compensation of 25 per cent was recognized as being highly justified. As a result of this suggestion, faculty salaries were increased 10 per cent effective September 1, 1958, (from \$100 to \$110). This increase was accomplished without changing fees to the students. An increase in faculty compensation from \$110 to \$125 is recommended for the school year 1961-62. It may be necessary to increase fees to bring them more nearly in line with those established for other evening classes in the area.

The Graduate School, during the current school year, continued to strengthen its financial condition. During the last two years a number of changes have been made in the office in order to provide more adequate facilities, needed new equipment has been purchased, pay increases have been made to match the Government pay raise, and employee insurance and health benefits have been added. However, notwithstanding these added expenses, the Graduate School again shows a nice balance of income over expenditures.

THE TOTAL THE MONEY MORE THE

reculty cancheons were conducted outing the year wan discussions payering a wide range of replos designed to broaden the interests ent knowledge of acculty and committee members and to improve insuration and prompts (ellowed to an personal identity with the Graduale School

Monchly Mewaleners continued to be published to keep the inculty and ounce as craises of the activities of the school. A few pictures were added for variation and emphasis,

In about dianct depting for facing and committee members was given at the freeze Club to laudch the new saided year. Wearly 300 attanded as guests of the General Administration Coard. In. Chaumae, O. taaks Assistant Dean and Processor of Planmacology in the school of Medicine, Ohio State university, was the guest speaker. Twenty-year length of Medicine, Ohio State university, was cambers and carritosise of accompliant and rest given to deserving students. The family members receiving the navary-vest exacts were in deserving students. On Example, and the twenty-vest example were instanced Alin.

PENANCIAL SILLEMPAT

Involvent and, in the 1957-58 Animal Apport, an incresse in faculty compensation of 25 per cent was successed as being indices installed. As a result of this suggestion, faculty enlarces were increased at our cent effective betternion 1958, (bom \$100 to \$170). This increased was accomplished without changing fees to the students. In increased in tample, communication now \$100 to \$125 is recommended for the state of year 1951-52, is never by increase fees to the state of the state o

The Gradunia Mahoul during the Curtum School year, communed as supplying its financial condition, Juming the Laut two years a number of changes have lead aged in the old ce in coder to provide more adoquate Lacilities, needed new equipment has been purchased, bay increases have been maded to not the increases have been maded to not the adoquate insurance and needs for more lave cern added, flowsyst, notwithstanding these adoed expenses, the Gradumin School ogain shows a nice belance of increase over expensions.

The Graduate School has been constantly increasing its net worth, as shown below. The net worth as of August 31 for the last six years is as follows:

1955.			٠	٠	.\$1	52,454.97
1956.					. 1	62,169.08
1957.					. 1	85,009.90
1958.					. 2	09,170.47
1959.					. 2	22,756.73
1960.					. 2	39.018.99

A LOOK AHEAD

In addition to continuing our goals of last year, we are focusing on the following goals:

1. To increase student participation in certificate programs.

We are taking a careful look at our present certificate programs. Interested students are being identified. It may be necessary to change some of the programs, others may be dropped and new ones added. A new certificate has been inaugurated in Library Techniques.

2. To expand special programs to meet changing needs.

We are receiving many requests for special programs. One of our problems here is to establish the proper priority in program selection. It is essential for us to determine the need, inventory the resources and select those programs in which we are competent to perform high quality educational service.

3. To explore the ways of extending our program in the area of liberal adult education for selected Federal employees.

Our third goal is difficult because it is easier to be concerned with specific professional and technical education than with general liberal adult education. It is an area in which motivation is not so high, therefore it is our plan to explore liberal adult education on a limited and selected basis. Currently it is our tentative plan to incorporate such a program as a supplementary feature of our spring lecture series which is to be on International Affairs.

The Graduete School has been constantly increasing its not worth, as shown below. The net worth as of August 31 for the last six years in as follows:

18.08.						
	1,88					1822
10-07						

CALHA ROOLA

To addition to continuing our goals of last year, we are focusing on the following goals:

1. To increase studiest participation in certificate programs.

we are taking a careful look at our present certificate programs. Interactor students are being identified. It may be necessary to change some of the programs, others may be dropped and new ones added. A new certificate has been inaugurate in Library Techniques.

2. To expand special programs to meet changing needs

We are receiving many requests for special programs. One of our problems here is to establish the proper priority in program schooled. If is essential for us to determine the maid, investory the resources and school drop programs in which we are comperent to perform high quality educational service.

1. To explore the ways of extending our program in the eres of liberal adult education for selected Federal umployees.

Our third goal is difficult because it is easier to be concerned with specific professional and bechnical advantantion than with general liberal advic education. It is an area in which motivation is not so high, therefore it is our plan to explore liberal advit education on a limited and selected basts. Currently it is our tentative plan to incorporate such a program as a supplementary feature of our apring lecture series which is to be on international Adalts.
